

OVERVIEW

Doo Consulting is actively engaged in supporting sustainable design, high performance buildings and emerging green building initiatives through consultation, education and advocacy. We are interested in advancing sustainable practices by assisting national organizations inform their members of sound green business strategies for their industry and by working with municipalities to create innovative public policy. For building projects, we assist design teams to integrate sustainable strategies into all phases of development and administer the LEED process. For organizations, we create tailored programs and workshops to guide it toward meaningful integration of sustainable business practices.

WHAT WE DO

Project Support

Doo Consulting works with project teams to create sustainable projects and green buildings. Utilizing an integrated design approach, we assist teams to achieve

- Sustainable site design
- Maximum energy conservation
- Maximum water conservation
- Healthy material and resource selections
- Healthy indoor environments

Doo Consulting provides services to guide, coordinate and administrate the LEED certification process. We are actively involved in the application of the LEED for New Construction, LEED for Schools, LEED Core & Shell, LEED for Commercial Interiors and LEED for Existing Buildings rating systems. We are currently involved in the coordination of LEED credits for the “Portfolio” program.

Education

Doo Consulting provides presentations on topics of sustainable design and development tailored to your industry and geographic region. We will help you understand how your business defines sustainability and how this definition reflects on your projects and operations.

Strategy

Doo Consulting will help you create a vision of sustainability for your company or organization. We will bring your stakeholders together to clarify aspirations, commitments and contributions. We will develop strategies to meet or exceed your sustainability goals.

Implementation

Doo Consulting will work closely with your team, staff or business community to develop an implementation plan for your project or green initiative. We are also available to assist in the execution of that plan. We can guide the development of capacity within your organization to meet your goals.
