

Peter Doo, AIA, LEED AP, is founder and Partner of Doo Consulting LLC. He is a recognized leader in the sustainability industry with experience assisting companies and project teams meet their sustainability goals. Peter is a commissioner on the Baltimore City Sustainability Commission and a member of the State of Maryland Green Building Council.

2009 recipient of the Maryland Daily Record “Innovator of the Year” award, Peter is credited with founding the Maryland Chapter of USGBC headquartered in Baltimore and served as its first president. He is Past-Chair of the North East Corridor Regional Council of the US Green Building Council and served on the USGBC National Chapter Steering Committee at that time. Peter co-chaired the Baltimore City Green Building Taskforce and is credited with reaching out to the broader community, including developers, City agencies and others to craft a supportable package of recommendations for Baltimore City. He is a past president of the Baltimore Chapter of the American Institute of Architects.

As an architect, Peter has designed LEED certified, LEED registered and net-zero energy projects. He brings this experience to assist design teams in developing creative, project specific and appropriate strategies for sustainability. He assists clients in crafting policy and implementation plans for achieving sustainability goals and assists project teams in the LEED certification process for their green buildings under all of the LEED rating systems.

Peter speaks regularly to schools, businesses and associations on issues of green buildings and sustainable development. He likes to garden and golf – sometimes simultaneously.
